

Hello,everyone,good morning to all of you with respective sir.So today we are here to talk to about our presentation topic Hacking which is the most controversial think is this world.

So I am akbar as team leader,this is abir ,sanjida,ayon ,shuvo,jannat,sadia,siyam,nazifa as well.

And today our whole presentation topic will be covered by this content name

1. History(sanjida)
2. What is hacking(siyam,26th batch as ashik)
3. Hacker&how does hacke hacks(akbar,nadiya)
4. Types of hacker(abir)
5. Why do hackers hack(nazifa,abir)
6. Types of hacking(jannat)
7. Types of hacking programme (shuvo)
8. Some biggest hacks in history (26th kafi anada)
9. Conclusion (ayon)

Now we are gonna knowing about these topic

so first of all sanjida will be telling us about the history of the hacking

-thank yoy sanjida ,all right.we have just known the history of the hacking

So let's move on the next item ,which will be described by siyam/ashik

Ahh!thank you siyam/ashik

so we do see here right now about hacker(what actually hacker is&how do hackers hack)

Hacker is a person skilled in information technology who uses their technical knowledge to achieve a goal or overcome an obstacle, within a computerized system. those people who hack for illegal asset

they are called black hat hacker, And those are hack legally are called white hat hacker or ethical hacker.

how do people get hacked: one way is to obtain information indirectly from an internet-connected device by installing spyware,which sends information from your device to others without your knowledge or consent.Hackers may install spyware by tricking you into opening spam email,or into "clicking"on attachments,imagees, and via links in social media as well.also hackers use vulnerabilities to block system access gather information ,or gain access to more computers in a network.hackers can use keyloggers and other tracking software to capture your phone's keystrokes and record what you type, such as search entries , login credentials,passwords,credit card details,and other sensitive information like your privacy(image,videos,audios etc), so that's about hackers

now i'm going to handover to arman abir who's in going to continue, and talk to you a little bit about visuals in presentation
thanks abir,

now I would like to think jannat to carry on that topic types of hacking,jannat you may

.all right,thank you jannat,

now our next topic is about tpyes of hacking programme and shuvo will be telling us about this

thanks shuvo,ahh lwe are almost done and close to end of this presentation

Our visual presentation is about some biggest hacks in history ,and ananda vai will be telling us about this history

.thank you vai, so we are almost done of this presentation and ayon will summarize this presentation
